

Field application engineer – IP applications

UnitronGroup is the market leader in the development and manufacturing of electronic accessories and appliances for the digitalization of audio-video and telecommunication systems.

We are an international group of companies with headquarters Unitron NV in Poperinge, Belgium and manufacturing divisions and R&D divisions in Belgium, the Czech Republic and China.

Our standard products are sold through a network of distributors under our brand name “Johansson” as well as under “private label”.

High-technological RF and IP products and projects are delivered OEM to international industrial operators and partners.

To develop and support the IP technology and products we are looking for a field application engineer for our establishment in Poperinge(B)

Your duties and responsibilities

- Give technical support to the customers for new applications, also on-site
- Give technical support at exhibitions
- Give feedback from the field to R&D
- Give support in defining new products or add-ons
- Work out and realize new applications and demonstrations internally
- Work out applications in cooperation with the customer
- Organize training of our products, on-site as well as in Unitron
- Test and verify competitor products and systems

Your qualifications

- You have a bachelor or master in IT
- You have practical knowledge of soft- and hardware
- You are well-organized and communicative
- You are customer minded
- You are willing and anxious to learn.
- You have a good knowledge of Dutch, French and English, both written and spoken
- You are willing to travel abroad.

We offer

- An exciting job in the newest technologies in telecommunication and multimedia applications
- The chance to be creative and to take initiative
- A competitive salary and extra legal benefits
- Starting on project basis with the chance on an open-ended employment contract
